When You Click the Favorited Order Set Icon (to the Right of the Search Bar), this Screen Shows Up. "Browse" Allows You to See Your Custom Order Sets. You Can Quickly Jump to Different Custom Orders by Clicking the Headers in the Navigator Panel.

The screenshot displays the Epic Hyperspace interface for a patient named Adultf-B P. Zztest. The main window is titled "Order and Order Set Search". On the left sidebar, under "Preference Lists", the "Order Sets" section is expanded, showing "Favorites", "Orders", "Lab Sets", "Nursing", "Precautions", "Activity", "AM Labs", "STAT Labs", and "Infectious Workup". A red arrow points to the "Order Sets" section. In the top right of the search window, the "Browse" button is circled in red. The search results are organized into sections: "Order Sets" (Favorites), "Orders" (Lab Sets), "Nursing" (Precautions), and "Activity". The "Favorites" section lists two items: "Annual Wellness Visit Express Lane (My Version - MLA Comprehensive)" and "General Medicine Admission (My Version - General Medicine Admission MLA)". The "Lab Sets" section lists "Admission Labs", "Morning Labs", and "Weekend Labs". The "Precautions" section lists "Aspiration precautions", "Bleeding precautions", "Suicide precautions", "Fall precautions", "Flight risk", "Adjust HOB", "Seizure Precautions", and "Neutropenic precautions". The "Activity" section is partially visible at the bottom. The bottom of the screen shows "0 UNSIGNED ORDERS".

Important Note About Custom Orders!

- EPIC and Northwell Prefers, whenever possible, for you to use Northwell-Specific Order Sets
- Using these Order Sets are meant so that you don't forget things
- **Also, if you do not use order sets (such as the Sepsis Order Set), then EPIC will bombard you with alerts and flags you have to keep checking until you DO use the order set**
- The Quick Orders that you use, therefore, should only be used **after** you have used the appropriate Order Set

Important Northwell Order Sets

- Acute Bacterial Pneumonia – CAP
- Acute Coronary Syndrome
- Alcohol Withdrawal
- Blood Products
- Comfort Care
- CVC, HD, or PICC Catheter Insertion and Management
- Decompensated Heart Failure
- Diabetic Ketoacidosis
- Discharge General
- General Medicine Admission
- Intensive Care Unit Admission
- Pain Orders Medicine
- Sepsis Management
- VTE ppx – Medical
- Ventilator
- Code Stroke (Under a Different Header)
- Diabetes Orders – Non-Pregnant Adults/Pregnant All Ages (Under a Different Header)

Other Order Set Notes

- Please read through the order sets and click everything that is appropriate in order to ensure it is input correctly
- You may sometimes need to click the order set in the actual "Sign Orders" Panel on the bottom right to edit the set
- **In the Sepsis Order set, make sure that a sepsis timer is checked off. If a patient comes from the ED with Sepsis flags, but they have ordered the appropriate work up and treatment, you can specifically only order a "sepsis timer" order to reduce the flags.**
- This is especially important in order sets such as heparin order sets, which automatically set an initial bolus and subsequent boluses. **In general, you should unselect these initial bolus and subsequent bolus options (except in select few cases).** An example to follow:
